

Partial In-Kind Replacement of Stone

Partial Face ***The Arcade*** ***Building***

Before

The ornate stone and stone surrounding was damaged and missing along the corridor

During

Staat provided new ornate and surrounding stone to match the original conditions. The stones were replicated from vintage photos as the pieces were nowhere to be found.

After

The stone has been reinstalled. The new stone had to be cast and coated to match the original colors from historical photographs.

Masonry Restoration Project

Staat Tuckpointing was contracted by Paric to lend expertise and manpower for the masonry restoration on this building, currently on the National Register of Historic buildings. The exterior masonry was in serious need of restoration as the building sat empty for 30 plus years. Staat was involved with brick rebuild, brick/stone tuckpointing, new stone fabrication/installation, stone patching, lintel replacement, granite refurbishment/replacement, marble refurbishment/replacement, masonry coating, and replacement of exterior joint sealants.
